Profile

Front-end React developer with 1.5+ year of commercial experience. I work with technologies such as JavaScript, TypeScript, React, Redux, Mobs, and also have a little experience in developing a backend on Node.Js using technologies such as NestJS, Express, TypeORM, PostgresSQL, Redis. He participated in projects from large customers, developed from scratch a universal configurator for a large online store, a platform for creating microcontroller firmware, a script for analyzing user actions and displaying recommendations for him.

Employment History

Fornt-end developeratFreematiq (full time), Barnaul

07/2021—Present

I was engaged in the development of React applications from scratch, as well as participated in other projects of the company to refine the current functionality. I actively used TypeScript, React, MobX in my work.
• Optimized React application and reduced loading time by 560%, for this I transferred the project to the NextJS library.
• Refactor outdated projects in SPA applications using React, ReactRouter, StyledComponents and MobX
• Designed REST API with diverse data validation, documenting using Swagger editor and OpenAPI specification, for this task I used NestJS and TypeOrm

Back-end developeratFreematiq (internship), Barnaul

05/2021—07/2021

As part of the internship, I made a universal assembly for the admin panel from scratch, then improved the project by rewriting it to NestJS.
In the process, I actively worked with such technologies and frameworks as: Express, Net Js, Type Rm, Sequelize, Postgresql. I also got a little acquainted with unit tests on Jest.

Education

Bachelor, Altai State Technical University, Barnaul

08/2021—Present
